

Your accounting software tells you what happened. We tell you why — and what to do next.

Move from staring at raw numbers to making board-ready decisions. We handle the data. You get the direction.

The Cost of Not Knowing

Most businesses don't fail from big disasters. They bleed slowly — from gut feel and delayed visibility.

~23%

more profitable

Data-driven businesses outperform peers by 20–25%.

If your profit is ₹10L, you're leaving ₹2–2.5L on the table.

— McKinsey

15–25%

revenue lost

Poor data visibility bleeds up to a quarter of revenue.

For a ₹1Cr business, that's ₹15–25L annually — untracked leakages.

— Gartner

70%

of failures

Businesses fail because owners see problems too late.

Not competition. Not GST. It's late visibility.

— Industry Research

The "Done-For-You" Intelligence Service

You run the business. We run the numbers. We take your raw data — straight from Tally, spreadsheets, or standard ledgers — clean it, structure it, and run it through our proprietary BizLens engine.

The result? A crystal-clear, executive-level view of your business — delivered directly to you.

STEP 1 — THE FOUNDATION

Clean, Standardized Inputs

We work with your team to securely gather your period data — sales, variable costs, fixed overheads, and industry benchmarks. Everything is validated before the analysis begins.

The screenshot shows the 'Client Management' section of the BizLens application. It includes a 'Business Performance' form with the following fields:

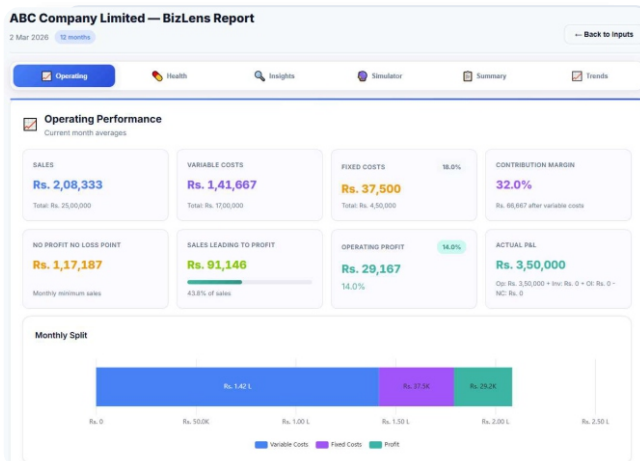

- Industry Benchmark: Manufacturing
- Period (months): 12
- Sales (₹): 25,00,000
- Variable Costs Breakdown:
 - Direct Materials (₹): 14,00,000
 - Direct Labor (₹): 2,00,000
 - Packaging & Logistics (₹): 50,000
 - Other Variable (₹): 50,000
 - Total Variable Costs (₹): 17,00,000
- Fixed Costs Breakdown:
 - Rent/Lease (₹): 2,40,000
 - Salaries (Fixed) (₹): 1,20,000
 - Utilities (₹): 20,000
 - Marketing (₹): 20,000

STEP 2 — THE REALITY CHECK

Operating Performance

Where does your business actually stand this month? We break down your core profitability — your No-Profit/No-Loss point, Contribution Margin, and exactly what is eating into your overheads.

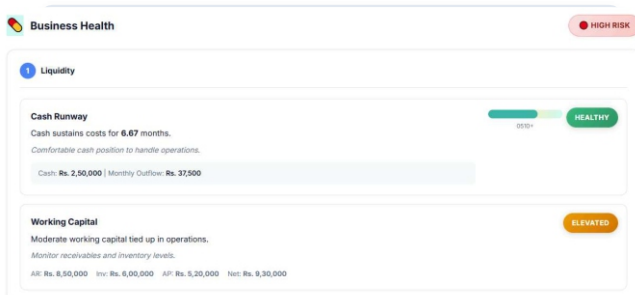

No jargon. Just clarity on what's working.

STEP 3 — RISK MANAGEMENT

Business Health Diagnostics

Growth is great, but survival is mandatory. We diagnose your business across critical pillars to spot risks before they become real problems.

Liquidity & Discipline

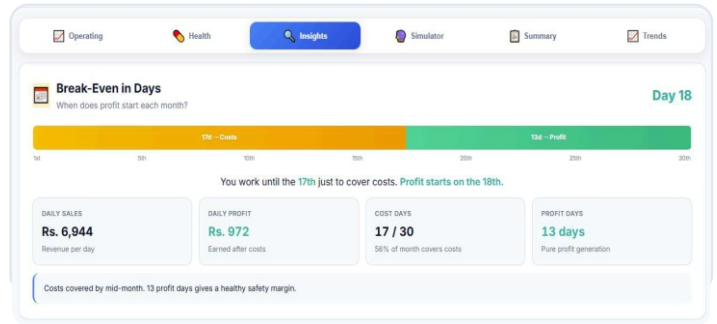

We calculate your exact cash runway and flag high-risk receivables. Our traffic-light system shows you where your cash is trapped — and whether collection discipline needs immediate attention.

• STEP 4 — STRATEGIC CLARITY

Deep-Dive Insights

We translate raw numbers into human reality. We show you exactly which day of the month your profit actually starts — your Break-Even in Days.

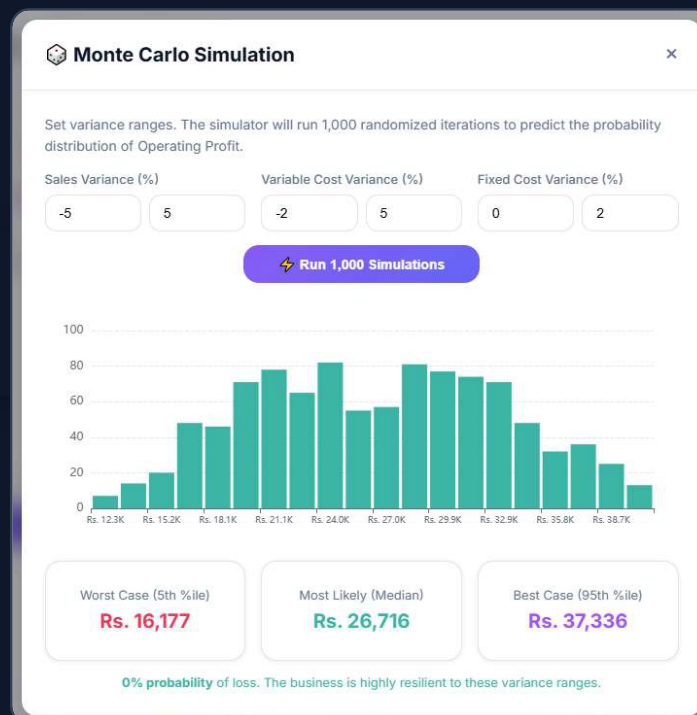

We also map your complete Working Capital Cycle, showing how to free up cash by collecting or paying just a few days differently.

• STEP 5 — FUTURE PROOFING

Scenario Simulator

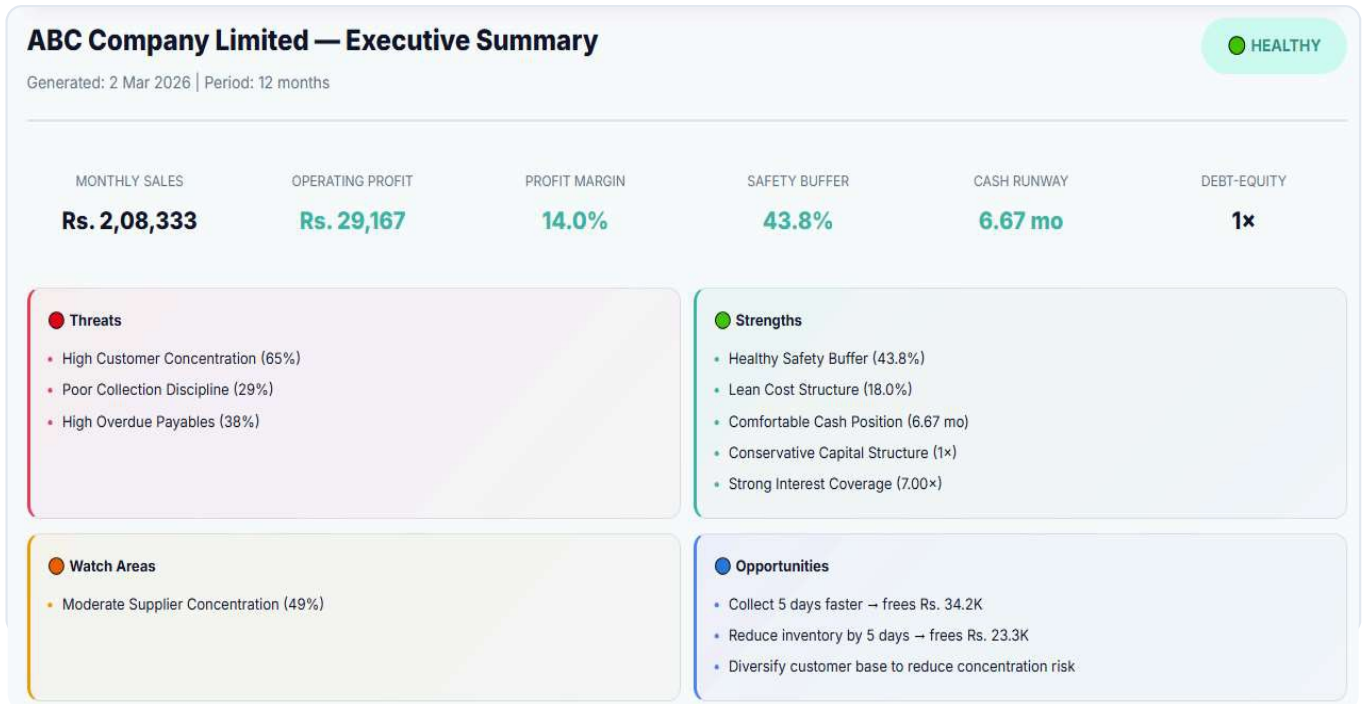

Don't just analyze the past — test the future before risking your capital. Tell us your target profit, and we calculate the exact changes needed in sales or costs to get there.

We run 1,000 randomized Monte Carlo iterations to give you the mathematical probability of your best-case and worst-case scenarios.

The Final Deliverable

You don't just get a dashboard. You receive a complete, board-ready Executive Summary — your Strengths, Threats, and a step-by-step Priority Action Plan.

The Monthly PDF Report

Every period, we deliver a pristine, comprehensive PDF report — all our findings, visual charts, and strategic recommendations in one document.

Perfect for stakeholder meetings, board presentations, or simply your own peace of mind.

Ready to see your business clearly?

Stop guessing with your financials. Let us handle the data work so you can focus on building the business.

Let's talk about your numbers.
